

Title

Box to be filled in by the Revista Catalana de Pedagogia

Abstract

Abstract should be of 150 to 200 words. The reason and objective of the experience, the methodology used, the most outstanding results and the main conclusions will be briefly described.

Keywords

5-6 keywords are expected to identify the content of the article.

1. Introduction

Theoretical foundations and the main purpose of the experience should be detailed here.

2. Need analysis

If applicable, a need analysis must be presented in order to justify the intervention proposal detailed below.

3. Context

The context of the intervention proposal must be detailed.

4. Experience or Intervention's proposal

This section must be presented in such a way that the reader understands the development of the experience. Contents, activities, methodology and evaluation should be detailed.

In the case of figures or tables taken from other authors, the source will be indicated. If they are prepared by the authors (own elaboration) or have been adapted, this should also be indicated. As for the way of citing them, the criteria of the American Psychological Association (APA) standards must be followed.

5. Results

If applicable, the results of the experience or intervention must be presented here.

6. Conclusions and discussion

They summarize the main results obtained and advance ideas or possible future prospects.

7. Acknowledgments and funding

Collaborators who made substantial contributions to the study or experience should be acknowledged. Any sources of funding should also be clearly identified by the Grant/Contract received and the Award Number.

8. Notes

They will be numbered sequentially and will be placed at the end of the article, before the bibliography.

9. Bibliography

References must be added at the end of the manuscript and should only include the bibliographic references that have been cited within the text. References will be ordered alphabetically based on the authors' last names and, in the case of references with the same authorship, they might be included following a chronological order. References within the text in the bibliography will be made using the author's surname system and the year of publication in parentheses. Regarding the way of citing bibliographic references, the criteria set forth in the following examples will be followed, based on the standards of the American Psychological Association (APA).
